INFOR SUNSYSTEMS

SunSystems – Is a Financial Management Software (FMS). It is used by over 9,000 companies worldwide due to benefits like multi-currency, analytics, IFRS and GAAP reporting.

Infor SunSystems is a powerful financial accounting solution that connects seamlessly with organizational systems and provides you with a centralized, real-time view of data across the entire enterprise.

Benefits of Infor SunSystems are a faster decision process, better planning, more efficient business, a competitive advantage, and allows for integration.

Managing Financial Obligations

The financial management system is also known as the financial information system and exists to fulfill a very unique objective within the business: it is there to meet the financial obligations of the business as those obligations fall due. It seeks to do so while using the least possible amount of financial resources within the limits of some predetermined margin of safety.

Infor SunSystems will produce certain outputs, including operating and capital budgets, accounting reports, working capital reports, forecasts of the cash flows, and analyses based on the considerations of various scenarios. The financial data itself may be analyzed in various ways, including trend evaluation, ratio analysis, and financial modeling. The twin processes of financial planning and forecasting, in turn, are made possible by combining the FMIS with a Decision Support System, or DSS.

What Does Infor SunSystems Do?

Essentially, a financial management information system exists to accumulate financial data and then analyze that data in order to allow the decision makers in the business to make better decisions. While each system will have certain strengths and unique features, there are certain functions of a financial information system common to most systems:

Collect information

Infor SunSystems collects information in a manner that is accurate, timely, complete, reliable, and consistent. The information that passes through the SunSystems leads to results that can be trusted.

Reports

Infor SunSystems is ideal financial management information system that provides management reporting to accurate levels. These reports can then assist the management of the business to make high-level decisions for the direction of the business.

Support policy decisions

Infor SunSystems supports policy decisions in the organization. When policies are made, they should be backed up by accurate and reliable data, which should ultimately come from the Infor SunSystems.

Preparation and execution of budgets

Infor SunSystems supports the preparation and execution of budgets within the business. The preparation of budgets should be based on financial reports emanating from the SunSystems. Meanwhile, real-time data from the SunSystems should inform the management about their execution of the budgets so they know whether they are within limits or exceeding them.

Financial statements

Infor SunSystems facilitates the preparation of financial statements. Financial statements are prepared for both internal use and for external stakeholders. They should be prepared using accurate and reliable information, which can be obtained from Infor SunSystems.

Information for budgeting, analysis and reporting

Infor SunSystems provides information for budgeting, analysis and reporting. These are three important high-level functions within any business and can only be effectively carried out if the data produced is accurate and reliable, as would be expected from a properly functioning financial management information system which is SunSystems.

Audit trail

Infor SunSystems provides an audit trail to facilitate the audit process in the system. By maintaining records of every single transaction that occurs within a business, SunSystems makes it possible to carry out an audit effectively.

What Are the Building Blocks of Infor SunSystems?

There are many elements that make up Infor SunSystems, each with its own function. Some of them have to do with the accounting functions of the organization; others are concerned with planning, others analysis, and others reporting. The following are the main elements you will find in Infor SunSystems:

- ***The general ledger.***
- ***The accounts payable.***
- ***The accounts receivable.***
- ***A budgetary accounting module.***
- ***A procurement module.***
- ***Corporate allocation module.***
- ***An asset module.***

Why choose Infor SunSystems as your financial management solution

1: Infor SunSystems provides full financial functionality across your business

Develop a financial overview of your company in order to control costs, mitigate risk and gain business insight for improved decision-making. Capture financial and business details from a high-level company overview down to transactional levels. Don't wait on IT for information, obtain current, critical information anytime, anywhere you want.

2: Infor SunSystems offers a fast return on investment

With Infor SunSystems you can conduct streamlined reporting and financial analysis within a single integrated environment, capturing the detail required to gather a clear, complete image of your business. When using disparate systems, this process can take multiple employees days to configure and correlate, however with Infor SunSystems, the data is available anytime thanks to simpler reporting and analysis functionality. Take control with the unified ledger, which gives you fast, easy access to smart transactions that deliver not just data, but detailed information with context that you define.

3: Infor SunSystems is the global leading financial management solution

Infor SunSystems has over 30 years of financial experience built in, and is utilized by over 9,000 customers in more than 190 countries. The system mirrors how you do business and provides one consistent data set, so no matter how global your company aspires to be, Infor SunSystems will be able to accommodate your needs.

In my mind Infor SunSystems is a very good dedicated financial package on the market for mid-sized companies. It is very user-friendly and meets all the requirements of an accounting solution
- (Vincent Achibo-Consultant)

4: Infor SunSystems will grow with your company

With the ability to meet your needs today, but innovative and flexible enough to evolve with your company, Infor SunSystems offers opportunities for growth. It does more than cover basic requirements like multiple languages and currency, offering advanced features such as four-dimensional multi-currency and parallel accounting treatments. With Infor SunSystems you'll get everything you need to unite information across different sites, countries, business units, companies, and corporate offices. Plus, you can standardize financial management across countries, comply with multiple regulatory and reporting requirements and expand internationally without adding new systems.

"Now we are one large housing association consolidated around a single system rather than a complex structure of varying financial solutions. SunSystems is a system we can trust, and that integrates easily with our other solutions such as HR, payroll and professional advantage tools used for bank reconciliation and debt collection. This has allowed us to simplify our accounting practices."

5: Infor SunSystems provides security for the future

Infor has developed SunSystems extensively over the decades, and continue to draw upon their extensive experience in financial accounting to ensure the system remains at the forefront of technology. Developments have enabled cross-application process flows, intuitive social collaboration, and a more intuitive user interface with the introduction of Infor 10x. Ensuring that Infor SunSystems adapts and evolves with the market offers companies the support and stability required to grow.

“SunSystems is a good mid-range package and is a tried and tested system. It has been around for a long time and has plenty of reference sites. I had not only been involved with a SunSystems implementation before, but had used it as an end-user, so knew from first-hand experience that it is a good system.” - *(Vincent Achibo-Consultant)*

6: Infor SunSystems deployment options

Infor SunSystems has multiple deployment options ranging from on premise, cloud and hybrid. The flexibility of the software allows your company to choose the most appropriate deployment for your needs.

7: Infor SunSystems specializes in various industries

Infor SunSystems is adaptable and flexible, enabling it to be used in over 100 vertical markets. The product offers specific functionality for a variety of industries including oil and gas, not for profit and tour operators.

“I would recommend SunSystems for the functionality within the system which is superb. The way it can be customized to a particular organization and accurately meet your teams’ daily processes is second to none.” - *(Vincent Achibo-Consultant)*

8: Infor SunSystems integrates with other systems

You’ll be able to seamlessly integrate Infor SunSystems with any other enterprise, financial or asset systems you already use thanks to Infor’s Intelligent Open Network (ION) middleware. This allows you to eliminate operational silos, dramatically improve exception management, and achieve unparalleled end-to-end efficiency.

9: Infor SunSystems is easy to use

The Infor SunSystem’s interface utilizes terms and functionality familiar to accountants and financial management teams. With Infor 10x the system’s interface has been further streamlined and visually enhanced to continually improve usability. Once users are familiar with the system they will benefit from the unified ledger and simplified budgeting, forecasting, and financial planning processes.

When it comes to new users, Infor SunSystems has procedures written down so everything is clear, and Q&A really helps with ease of reporting.

10: Kenite Systems Company supports Infor SunSystems

Once you have selected Infor SunSystems you need to carefully consider the partner you choose
